Scheduling

Appointments can be scheduled Monday through Friday from 7 a.m. to 3 p.m. through the central scheduling numbers listed above. We have 24-hour emergency coverage at all facilities.

UPMC Interventional Radiology

servicing patients close to home

Today, many conditions that once required surgery can be treated non-surgically by interventional radiologists. Interventional radiology treatments typically offer less risk, less pain, and less recovery time compared to open surgery.

UPMC is an equal opportunity employer. UPMC policy prohibits discrimination or harassment on the basis of race, color, religion, ancestry, national origin, age, sex, genetics, sexual orientation, marital status, familial status, disability, veteran status, or any other legally protected group status. Further, UPMC will continue to support and promote equal employment opportunity, human dignity, and racial, ethnic, and cultural diversity. This policy applies to admissions, employment, and access to and treatment in UPMC programs and activities. This commitment is made by UPMC in accordance with federal, state, and/or local laws and regulations.

About Our Services

Pittsburgh-area physicians can now refer patients for the widest range of interventional radiology services to UPMC Interventional Radiology at one of our eight community locations.

For patients requiring diagnostic imaging, line or port placements, stents, embolization, or drain insertions, UPMC interventional Radiology offers state-of-the-art interventional imaging modalities and procedures including PICC line placement and angioplasty.

Procedures we offer

- **Vascular:** angiography, balloon angioplasty/stent, DVT, PVD treatment, venous intervention, IVC filter placement/retrieval, neuro diagnostics, embolization, adrenal vein sampling
- **Hematology/Oncology:** chemoembolization, port placement, pheresis cath placements, Hickman placement, PICC line placement, radiofrequency ablations, TIPS, biliary intervention
- **Renal:** nephrostomy tube placement, ureteral stenting, renal artery angioplasty and stenting, renal RFA for tumor ablation
- **Gynecology/urology:** uterine fibroid embolization, varicocele embolization
- **Orthopaedics:** kyphoplasty, vertebroplasty, bone/soft tissue tumor embolization

Additional procedures

- CT and ultrasound-guided tissue biopsies of all organ systems
- Full range of image-guided pain management procedures
